PROFESSIONAL SUMMARY

Creative and user-focused UI/UX Designer with experience designing mobile and web applications through research-driven design processes. Skilled in Figma, wireframing, prototyping, information architecture, design systems, and responsive interface design. Experienced in creating accessible digital experiences for industries including agriculture, healthcare, and education. Strong understanding of frontend technologies including HTML, CSS, and JavaScript, enabling effective collaboration with developers and seamless design implementation.

EXPERIENCE

Project: Sync Pulse – Fitness Tracking App

Role: UI/UX Designer

Tools: Figma, Adobe Photoshop, Adobe Illustrator

Designed a fitness tracking mobile application concept to solve challenges around workout consistency, progress tracking, and user motivation. Created a user-centered experience through research, user flows, wireframes, and high-fidelity UI designs, including personalized onboarding, workout tracking, nutrition management, progress analytics, and community features. Developed an intuitive fitness ecosystem focused on simplicity, personalization, and long-term habit building through interactive prototypes and a scalable design system.

Pep softwares

January 2025 - Now

UI/UX Developer and in Erode

Project: FEEDIT Mobile App for RGS Feeds

Role: UI/UX Designer

Tools: Figma, Adobe Photoshop, Adobe Illustrator

The challenge was designing a digital shopping experience for rural farmers who were unfamiliar with complex e-commerce platforms and required a more accessible interface. Conducted user research and designed simplified information architecture, wireframes, prototypes, and high-fidelity UI screens focused on easy product discovery and ordering. Implemented regional language support, clear visual hierarchy, and trust-building elements like COD and delivery availability checks. The app is live on the Google Play Store.

Project: Hakir Pharmaceuticals

Role: UI/UX Designer & Frontend Developer

Tools: Figma, HTML5, CSS3, JavaScript, VS Code

Designed and developed a healthcare website experience to improve pharmaceutical brand communication and product presentation. Created responsive UI designs in Figma and converted them into a functional frontend using HTML, CSS, and JavaScript. Delivered a professional healthcare web solution optimized for desktop, tablet, and mobile experiences.

EXPERIENCE

Project: FIM Mobile App – Sai Saranya Agencies Role: UI/UX Designer

Tools: Figma

The company relied on manual paper-based quality inspection processes, creating workflow inefficiencies and data entry challenges. Designed an internal mobile application experience by creating user flows, wireframes, prototypes, and high-fidelity UI screens to digitize quality checks. The application was developed for internal employee operations.

Project: MochoooTV Role: Responsive UI Developer

Tools: Wordpress

Improved the mobile responsiveness of an existing educational website by optimizing layouts, content structure, and cross-device behavior. Enhanced mobile usability and ensured consistent presentation across smartphone, tablet, and desktop screens.

Graxi Design January 2024 - December 2024

UIUX Designer in Erode

Sakthi Sugars Ltd June 2022 - December 2023

Assistant Instrumentation Engineer, India, Erode

As an Assistant Instrumentation Engineer in the sugar industry, I optimize and maintain crucial instrumentation systems, emphasizing installation, calibration, and troubleshooting. My background in Electronics and Communication Engineering has led to notable achievements, such as a 15% improvement in process efficiency, and I play a pivotal role in ensuring compliance during regulatory inspections.

Britannia Industries Ltd October 2020 - May 2022

Line Checker, India, Erode

In my role as Line Checker at Britannia, I upheld high-quality standards and ensured production line efficiency through regular inspections and collaboration with the production team. My focus on meticulous documentation and effective communication contributed to maintaining Britannia's production performance, quality metrics, and safety standards, fostering a secure working environment.

Sundram Fasteners (TVS) Ltd. March 2017 - March 2020

Quality Technician, India, Chennai

The Quality Technician at Sundram Fasteners maintains high product standards through rigorous quality control, contributing to process improvements and actively participating in audits. They provide training for a collective commitment to quality, and their proven track record, including a 20% reduction in defects, underscores their integral role in delivering top-notch automotive products.
